## VAASA WIND & RENEWABLE ENERGY

19 MARCH 2019

## SMART ENERGY

20 MARCH 2019

*The largest energy cluster in the Nordic countries is located in the Vaasa region. The Vaasa region is known for developing technology for a cleaner, more sustainable and energy efficient world. The region stands for more than 30% of the energy technology export in Finland, a large share of which is aimed at renewable energy.*

On Tuesday the updated top event for wind power and renewable energy!

# VAASA WIND & RENEWABLE ENERGY

TUESDAY 19 MARCH 2019 | VAASA CITY HALL

In March 2019, experts and decision-makers in the renewable energy market will gather in Vaasa for the ninth time.

The new and improved **Vaasa Wind & Renewable energy** event presents innovation, technology and services for the operators of the energy sector, bringing together service providers, decision-makers and buyers. The exhibition, seminars, briefings and meetings provide an excellent opportunity to increase sales, to network and strengthen your brand.

This year's themes include the opportunities of building larger and more efficient wind power farms, on- and offshore, and industrial-scale solutions for energy storage. In Finland, large solar energy investments are also being made, and related technology and services are presented at the event. Other renewable energy sources will also be discussed.

Vaasa Wind & Renewable energy is an intense one-day expert event concluding with the popular **EnergyWeek evening**, where the professionals in the sector can meet casually.

## Programme

9.00-17.00	Exhibition and Meeting Lounge open
10.00-11.00	Opening
10.00-16.00	Exhibitors' briefings
	<u>Seminar</u>
11.30-12.30	Seminar part 1
14.00-15.00	Seminar part 2
19.00-02.00	EnergyWeek evening Fontana Club

## BUSINESS SECTORS

Planners and developers // Engineering companies // Manufacturers and subcontractors // Investors // Operation service, service and maintenance // Energy storage, accumulators // Grid development, energy distribution // Competence, solutions and services of the solar energy industry // Logistics and earthwork // Municipalities, authorities, associations and organisations in the sector // Other actors in the field

## VISITOR TARGET GROUP

- » Energy sector professionals, experts and decision-makers
- » Experts and decision-makers of the public sector
- » Environmental professionals
- » Planners, consultants, product developers, researchers

We reserve the right to change.

Wednesday is the smartest day of the EnergyWeek!

# SMART ENERGY

WEDNESDAY 20 MARCH 2019 | VAASA CITY HALL

Energy is a significant aspect in construction, sustainable development, and all of modern society. In order to make the most of renewable energy, new energy storage solutions, digitalization, property development innovations, and upcoming energy market business models, the entire energy infrastructure must be re-evaluated.

The **Smart Energy** day of EnergyWeek introduces the visitors to renewable energy generation and future smart solutions, including modern innovations and developments from all over Finland.

The expert day includes an exhibition, briefings and a seminar on current topics. The briefings and seminar focus on innovations in construction, electrification and automation, with a discussion on future developments from different point of views.

## BUSINESS SECTORS

Automation and grid technology // Digitalization // Artificial intelligence // Energy efficiency and self-sustainability of buildings // Circular economy in the energy business // Energy storage and control // Heat recovery and use of waste heat // Regulation of the energy markets // Business opportunities and innovations // Building services // Building automation // Maintenance, service manuals

## VISITOR TARGET GROUP

- » Energy sector professionals, experts and decision-makers
- » Utilities
- » Industrial customers
- » Property developers and managers
- » Urban and municipal developers
- » Engineers, consultants, product developers, researchers
